

This technical drawing illustrates a cross-section of a window frame assembly. The frame is shown in a dark, solid profile. The sash, which holds the glass, is depicted with a lighter, hatched pattern. The drawing details the internal components, including the sash cord or pulley system, the glazing beads, and the weatherstripping or sealant used to secure the sash within the frame. The overall structure is shown within a rectangular frame, with the sash positioned in the upper portion.
