

A technical drawing of a rectangular frame structure. The frame consists of four main members: a top horizontal member, a bottom horizontal member, a left vertical member, and a right vertical member. These members are connected at the corners by four corner supports, each depicted with a semi-circular base and a vertical post. The frame is divided into two equal horizontal compartments by a central horizontal member. This central member is supported by two vertical posts, one on the left and one on the right, which are connected to the corner supports. The entire structure is shown within a rectangular boundary, with a small detail of a corner joint shown in the bottom right corner.
