

Technical drawing of a cross-section of a mechanical part, likely a bearing housing. The drawing shows a central bore with a diameter of 75 ± 0.4 . The outer diameter is 100. The total width is 51. The inner bore has a width of 26. The drawing includes several callouts: 461380 points to the outer ring, 284790 points to the inner ring, 309630 points to the outer ring, and 284763 points to the inner ring. A surface texture symbol is shown with a value of 0.3. A section line A-A is indicated at the bottom.

This technical drawing shows a mechanical assembly in a cross-sectional view. On the left is a large, L-shaped component with a vertical section and a horizontal base. A small, rectangular component is mounted on the vertical section. In the center is a smaller, rectangular component with internal features, including a central cavity and several small, circular elements. On the right is another large, L-shaped component, similar to the one on the left, with a horizontal base. A small, rectangular component is mounted on the vertical section. The entire assembly is shown in a cross-sectional view, with dashed lines indicating internal features.
