

This technical drawing shows a cross-sectional view of a mechanical assembly. On the left, there is a large, angled block with a vertical rectangular cutout. A handle-like structure with a curved top is attached to the left side of this block. In the center, there is a complex, dark-colored component that appears to be a mold or die with multiple internal features and a central cavity. On the right, there is another large block with a vertical rectangular cutout, similar to the one on the left. This block has a clamping mechanism with two horizontal bolts or pins. The entire assembly is mounted on a base, which is shown in cross-section at the bottom.
